General Comments or Valuable Insight

We could see a little retrace in the Spu to 2077 to fill today's breakaway gap.

Soybeans have two full sessions to close and remain over 10.88 for an ORH week. I like the story and the long side of the grains.

Euro is into its yearly pivot and major support levels while trading oversold.

Look for a small bounce with an Index pullback.
112.34 is the monthly closing ORL#. Above, shorts will be run out.
