General Comments or Valuable Insight

Names and sectors are getting into short-term oversold areas.

This week is set up for a short-term low in the Equities. Will the low be into the gap in the Spu's or another 50 points lower?

My sense is that Trump will exterminate the rodent in North Korea along with neutralizing his nuclear capabilities.

The news will have an effect.

An armed conflict on the Korean Peninsula, would be good for AUD/JPY… Long Aussie/Short Yen

Japan is in the direct radiation zone and Australia, being in the Southern Hemisphere, is not.

In a perfect world we'd get a mid-week low and a rally, however it would be prudent to await potential military action before bottom fishing.

The Bund is into a big level with matching DAX level.

Yen is over baked.

Instruments are set up for a potential turn.

Trade the price and levels with tight stops
