Euro...25X3 Point & Figure. Tried twice today to put in a downside reversal thereby confirming a near term high.

Both times it failed to extend 70 ticks.

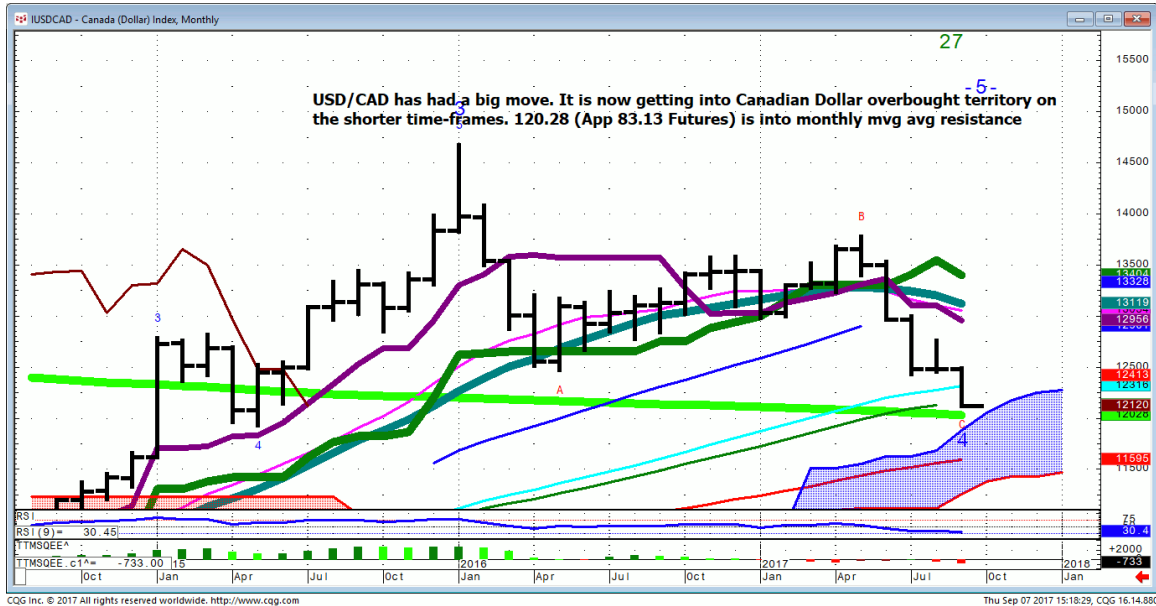

Euro...Annual I'm including this chart to show you the Euro is smack in the middle of its 20 yr. range, trading just above its inception price. It's nowhere in the big picture!!

Turn off the T.V.!!!!!!!!!!!!!! Stop listening to the yapping heads.

USD/CAD... currencies attract buyers when their rates rise. I have higher targets, but its Rsi says one should not chase.

General Comments or Valuable Insight

In last nights Notes from the Underground Yra said to be vigilant for Bund buying after Draghi spoke.

That's exactly what we got!

The ECB Bond buying took our treasuries along for the ride.

The board is an exercise in sifting through the names of what will not be affected by the Hurricanes or North Korea.

Chubb insurance got bombed today and ran the qtrly stops.

Most insurers have similar patterns. They are all short – term oversold. I do not feel the need to pick a bottom, but I will start monitoring the names for a possible blow off.

Tomorrow ends a volatile week with the VIX hovering either side of its 200 DMA.

Long only investors would be well served by buying VIX for the weekend just in case the bloviator on this side of the Pond or the other decides to do something stupid.
