General Comments or **Valuable Insight**

Regional Banks were hit today. WTFC (Cubby's Lose) and OZK both had ORL patterns. Both names are oversold and I do not believe the patterns are real.

Spu's & Nasd hit upside resistance levels.
Closes over today's highs are needed for more upside.

Russell & Midcap took it on the chin and broke into support.

Oil…I have a couple of spots that can screw longs in the mid to upper 70's.

Look for a hard mid-week shuffle break to reload.

The room will not be open tomorrow!!

If you send me a note asking about it I'll know you're not paying attention!

If you call or text about the room your rate will double.

Judd's room is open.
Invites are sent before NYSE Opens.

Please check your spam folder or your Google calendar if you don't see an invite.

Not there? Just let me know in the A.M. to get one when the room opens.

We begin answering questions around 8:15 CDT.

I will review any instrument available on my platform and tell you what if anything I see

These are simple moving averages. When you roll a chart to weekly or monthly the averages are simple weekly or monthly mvg averages.

The **reddish purple** is an embedded Imoku line which acts as momentum.

The **leaf green** is an embedded Imoku line which calculates 50% retraces.

Brown line is where the Macd with histogram crosses. The line shows the visual on every time frame so you don't have to guess looking at the price of the cross in a line study.
