General Comments or Valuable Insight

Don't fight the flow.

Rabid dollar buying started around 6 A.M. CDT casting the die for the day.

Those dollars were put to work buying big cap tech as soon as NYSE opened.

**Hamsters are busy selling every new high.
Supremely stupid!**

If you don't own them/don't sell them.

Traders and Investors are light on risk. There was indiscriminate call buying across names and sectors going into London's close.

Definitely not a high probability risk/reward time.

Wednesday rules will apply for tomorrow.

**Judd's room is open.
Invites are sent before NYSE Opens.**

**I've started screen sharing just after 7 A.M.
CDT. I start speaking @ 8:20.**

**Please check your spam folder or your Google
calendar if you don't see an invite.**

**Not there? Just let me know in the A.M. to get
one when the room opens.**

**We begin answering questions around 8:20
CDT.**

**I will review any instrument available on my
platform and tell you what if anything I see**

Chart Lines....Ichimoku

Green Bright...200 DMA **Aqua** 50 DMA **Blue Green** 21 DMA **Fuchsia** 18 DMA **Yellow** 10 SMA

These are simple moving averages. When you roll a chart to weekly or monthly the averages are simple weekly or monthly mvg averages.

The **reddish purple** is an embedded Imoku line which acts as momentum.

The **leaf green** is an embedded Imoku line which calculates 50% retraces.

Brown line is where the Macd with histogram crosses. The line shows the visual on every time frame so you don't have to guess looking at the price of the cross in a line study.
