General Comments or Valuable Insight

"It's the definitely the high or low for the rest of the week" David L.

This is the lightest DMI in quite a while.

I like the low in the Spreads matching the Index lows this week.

With the GEO political tweeting I have no idea which way the markets flesh out.

It's hamster heaven.

For the rest of us I'm keeping it to one or two short-term trades a day until we either confirm higher or puke into the Qtrly Pit gaps in the Indices.

Chart Lines....Ichimoku

Green Bright...200 DMA **Aqua** 50 DMA **Blue Green** 21 DMA **Fuchsia** 18 DMA **Yellow** 10 SMA

These are simple moving averages. When you roll a chart to weekly or monthly the averages are simple weekly or monthly mvg averages.

The **reddish purple** is an embedded Imoku line which acts as momentum.

The **leaf green** is an embedded Imoku line which calculates 50% retraces.

Brown line is where the Macd with histogram crosses. The line shows the visual on every time frame so you don't have to guess looking at the price of the cross in a line study.
