General Comments or Valuable Insight

The game is Sunday night into Monday.

Enough Futures were purchased in the last few minutes to make one think the fix is in @ the summit and we'll be up Sunday.

In the big picture I still need 2 consecutive closes above 2965 Spoo and 5030 Nasd 100/Bonds to confirm a big leg up.

The Crop report screwed all the producers.

Long Wheat/Short Bean positions got annihilated.

Looking for June expirations to set up the next trade.

These are simple moving averages. When you roll a chart to weekly or monthly the averages are simple weekly or monthly mvg averages.

The **reddish purple** is an embedded Imoku line which acts as momentum.

The **leaf green** is an embedded Imoku line which calculates 50% retraces.

Brown line is where the Macd with histogram crosses. The line shows the visual on every time frame so you don't have to guess looking at the price of the cross in a line study.
