General Comments or Valuable Insight

Once again, the Room showed its chops by making money on both the Long and short side of the market.

TSLA proved to be a big winner on the short side today.

Silver stalled @ its 50 Qtr mvg avg. 19.74. This will become a closing hurdle for more upside.

We went over various scenarios for tonight into tomorrow in the room.

**Are the patterns real?
Can they follow through?**

Tomorrow will tell.

**We Trade to Make Money
We don't trade to be right**

Judd's room is open.

Invites are sent before NYSE Opens.

I've started screen sharing just after 7 A.M. CDT. I start speaking @ 8:20.

Please check your spam folder or your Google calendar if you don't see an invite.

Not there? Just let me know in the A.M. to get one when the room opens.

W begin answering questions around 8:20 CDT.

I will review any instrument available on my platform and tell you what if anything I see

These are simple moving averages. When you roll a chart to weekly or monthly the averages are simple weekly or monthly mvg averages.

The **reddish purple** is an embedded Imoku line which acts as momentum.

The **leaf green** is an embedded Imoku line which calculates 50% retraces.

Brown line is where the Macd with histogram crosses. The line shows the visual on every time frame so you don't have to guess looking at the price of the cross in a line study.
