General Comments or Valuable Insight

Today's mantra was no shorting!

Natty names were in rally mode despite the Futures taking a break.

Amazon and Apple took up leadership early and never let go.

Spoo has traveled from matrix to close to matrix in 3 sessions.

I'm expecting a firm Tuesday (Month end) with buyers again on Wednesday for first of month flows.

Only after I see that price action play out would I be looking to sell rallies..

These are simple moving averages. When you roll a chart to weekly or monthly the averages are simple weekly or monthly mvg averages.

The **reddish purple** is an embedded Imoku line which acts as momentum.

The **leaf green** is an embedded Imoku line which calculates 50% retraces.

Brown line is where the Macd with histogram crosses. The line shows the visual on every time frame so you don't have to guess looking at the price of the cross in a line study.
